Blowers and Fans for Sale at Go2marine

Marine Engine Room Fans: Our AC or DC high volume fans are perfect for the purpose of assisting in the induction of air into and around your engine room. Combustion engines require air to produce horsepower, to support combustion, and for cooling purposes. In a traditional marine engine room with natural aspiration (ie: no fans), the only air movement is due to the air being consumed to support combustion.

High Volume Marine Fans | The Engine Room Ventilation ...

Now install the motor in the boat and make sure the ends of the cooling coil are in a position that allows you to put you silicon tubing on easily. Cut a piece of the fuel tubing and slide it on the coil and pickup. Put your speed control in position and cut another piece of fuel tubing to fit between the coil and ESC.
