The piece with the brush would weigh more. It is not the weight of the broom on either side of the CG that is the same, but the TORQUE. As in the seesaws above, the shorter piece has more weight.

Summary

A physics exercise does not really become a problem until you accept the challenge it offers and attempt to solve it. Once you have chosen to make it your problem, you have a personal interest in finding the solution. Each chapter of this workbook is divided into two or more topic sections that begin with some physics theory.
