## Coolant Hoses Connections Engine Ls3

There are a couple of solutions for bleeding air out of a cooling system. The first is to use the upper radiator hose to fill the engine. This allows the coolant to fill the engine from the top down, helping to force the air out. Once the upper hose overflows, connect it to the radiator and fill the remainder of the radiator.

So while the engine was at 212\* I got out and tested for hot spots with my inferred temp gun. I noticed that the upper and lower hoses were cool at around 175\*. Radiator was even cool to the touch. This showed me that I have a flow issue and water isn't flowing through the radiator to cool the engine. (YES, I know the coolant system well.
