### How Do I Remove the Rear Axle Bearing on a Ford F-150 ...

The F150 is a half-ton, full-size pickup truck made by the Ford Motor Company. Gear oil is used in the rear axle differential to lubricate the bearings and ring and pinion gears. F150s that are equipped with four-wheel drive also have a front differential that is very similar to the rear. If a leak is detected, the gear oil should be checked.

### How To Replace Rear Axle Seals and Bearings 98-13 Ford F150

There's no question, the easiest way to identify the axle and gear ratio in your truck is from the door sticker. If you open the

drivers door and look at the door jamb, you'll see a sticker like the one shown below: You'll see that the area labeled (F) is for the Axle Code.

Rear axle wheel bearings are a part of the F-150's suspension. The bearings allow the wheels to rotate while supporting the vehicle's weight. The constant weight load on the bearings can degrade the seals. A faulty seal can allow dirt, water and other contaminants to enter into the bearings and the grease to ...
