Exercises are designed to enhance your ability to write well-structured PL/SQL programs. Hope, these exercises help you to improve your PL/SQL query skills.

11 Tuning PL/SQL Applications for Performance

Creating a PL/SQL function Similar to a procedure, a PL/SQL function is a reusable program unit stored as a schema object in the Oracle Database. The following illustrates the syntax for creating a function: `CREATE [OR REPLACE] FUNCTION function_name (parameter_list) RETURN return_type IS`

PL/SQL Cursor By Practical Examples - Oracle Tutorial

The PL/SQL Comments. Program comments are explanatory statements that can be included in the PL/SQL code that you write and helps anyone reading its source code. All programming languages allow some form of comments. The PL/SQL supports single-line and multi-line comments. All characters available inside any

comment are ignored by the PL/SQL compiler.

SQL Exercises, Practice, Solution - w3resource

You do that by running two SQL*Plus scripts, `exampbld` and `examplod`, which are supplied with PL/SQL. You can find these scripts in the PL/SQL demo directory. The first script builds the database tables processed by the sample programs. The second script loads (or reloads) the database tables.

PL/SQL First Program: Hello World Example

Launch the SQL*Plus command prompt from the directory where you created your PL/SQL file. Type `@file_name` at the SQL*Plus command prompt to execute your program. If you are not using a file to execute the PL/SQL scripts, then simply copy your PL/SQL code and right-click on the black window that displays the SQL prompt; use the paste option to paste the complete code at the command prompt.
