### **What is an saturated and unsaturated solution? - Quora**

Saturated solution is a solution that did dissolve to the maximum capacity. Unsaturated solution is a solution that didn't dissolve to the maximum capacity. What are differences between a saturated...

### **Difference Between Saturated and Unsaturated Solutions ...**

- Saturated solutions are unable to dissolve solutes further in the solution phase, whereas unsaturated solutions could.
- Usually, saturated solutions carry a precipitate at the bottom but unsaturated solutions do not.
- With increasing temperature, saturation decreases but unsaturation increases.

### **What is the difference between saturated, unsaturated, and ...**

A solution is said to be unsaturated in which all the solute dissolves into the solvent and the solvent can be either liquid or gas. It is the solution that has not reached the saturation point into which more solute can be included. A solution is said to be supersaturated when there is more dissolved solute as compared to a saturated solution.

## **What saturated and unsaturated solution? - Answers**

Saturated solution refers to the fact that at a certain temperature, a certain dose of solvent cannot continue to dissolve solute, which means that the concentration of the solution does not change. At a certain temperature, a solution that can re-dissolve a substance in a certain amount of solvent is called an unsaturated solution of this solute.

### **Saturated and Unsaturated solutions Flashcards | Quizlet**

A solution with the maximum possible amount of solute is saturated. If a solution contains less than the maximum amount of solute, it is unsaturated. When a solution is saturated and excess solute is present, the rate of dissolution is exactly equal to the rate of crystallization (Figure 13.2.1b).

### **Saturated and Unsaturated Solutions | Chemistry for Non-Majors**

If more solute is added and it does not dissolve, then the original solution was saturated. If the added solute dissolves, then the original solution was unsaturated. A solution that has been allowed to reach equilibrium but which has extra undissolved solute at the bottom of the container must be saturated.
