Page 11 An amplifier with inadequate power can render a sound system unintelligible at normal operating levels. Matching the amp(s) to the speaker(s)—and selecting the proper connecting cable— are important ingredients of speaker system design. See Chapter 7: Amplifier Selection and Appendix A: Wire Size Charts for this critical information.

Reference design criteria requires 72 measurements, taken 360 degrees around the speaker, yielding 1,200 times more data. This data is used in the design of critical system components, enabling JBL to engineer complete systems that deliver smooth off-axis response. The result: clear, accurate sound at the listening position in any room.
