Steven Mithen

In *The Singing Neanderthals*, Steven Mithen draws together strands from archaeology, anthropology, psychology, neuroscience and musicology to explain why we are so compelled to make and hear music. Mithen explores music as a fundamental aspect of the human condition, encoded into the human genome during the evolutionary history of our species.

## **Steven Mithen - Wikipedia**

Faced with difficulties of such daunting scope, Steven Mithen remains undaunted. In his 1996 book, *The Prehistory of the Mind*, he argued that both the origins of thought and the origins of human language are natural outcomes of evolution. But according to the first chapter of Mithen's latest work, *The Singing Neanderthals*, that story was incomplete. What it neglected was the central role of music in the psychosocial makeup of our species... 'Without music,' Mithen writes, 'the prehistoric ...

However, a general consensus that the Divje Babe flute is actually a musical instrument has been growing as the view of the Neanderthals from subhuman brutes to more sophisticated humans is changing. In 2008, another discovery was made - a bone flute in the Hohle Fels cave near Ulm in Germany dating back 43,000 years.

### **The Singing Neanderthals: The Origins of Music, Language ...**

In The Singing Neanderthals Steven Mithen poses these questions and proposes a bold hypothesis to answer them. Mithen argues that musicality is a fundamental part of being human, that this capacity is of great antiquity, and that a holistic protolanguage of musical emotive expression predates language and was an essential precursor to it.

### **The Singing Neanderthals: The Origins of Music, Language ...**

Mithen appreciates that musical behavior may have had more than one adaptive function—and admits that, at least in Homo ergaster (a common ancestor of both neanderthals and sapiens), “singing and dancing may have provided both indicator and aesthetic traits for females when choosing mates” (p. 187).
