The Toro Flow and Pressure Gauge is a dual purpose device designed to measure water pressure to 160 PSI and water flow to 13 GPM. This flow and pressure gauge is not intended for use on lines larger than one inch. The gauge will only measure flow through the outside faucet – not in the line. To measure the static pressure:

### **Toro Sprinkler System Manual**

The Toro Lawn Dial Outdoor Irrigation Controller is a programmable electronic timer that controls the watering of six or eleven stations (depending on the model) using remote solenoid valves. In a typical irrigation system, there is a Master Valve (MV) which is switched on whenever one of the Station Valves (SV) is on.

system are the timer, zone control valves and sprinklers. The timer is the brain of the system, telling the control valves when and how long to supply water to the sprinklers. The sprinklers direct and control the water applied to the lawn and plants. Each valve controls a specific group of sprinklers called a watering zone.

1 sprinklers run for 10 minutes and shut off. Station 2 sprinklers turn on, run for 10 minutes and shut off. The controller skips station 3 and turns on station 4, which runs for 20 minutes and shuts off. Station 5 is skipped and the watering cycle ends at 5:40 AM. As you can see from this example, only one program
